

a Region-cluster bootstrap

b Precipitation forcing controls

c Slow-memory support audit

d Risk-closure ledger

- Spatial dependence**
cluster CIs reported; US/GB/BR remain positive
- Forcing confounding**
GB Q-P spectral contrast tested
- Slow-memory support**
 $De=1$ resolvability and tau thresholds audited
- Claim boundary**
diagnostic benchmark, not storage causality

All values are derived from public data or project source-data tables; no new causal claim is introduced.
